XUV URBA-FIX 1KG

Fieldcare Accessories for hydro-seeders

Model	XUV URBA-FIX 1KG
Price VAT incl.	€ 34
Price VAT excl.	€ 28,10
For use with	All hs systems
Product type	Erosion eliminating
Surface	0,8 gr/m ²
Weight	1 kg

A mix of different adhesives, liquids and additives
Ideal for use on steep slopes up to 1:1.

Dosage: 10 to 40 gr per 100 liters of water

Contents: 1 kg

Properties:

Better homogeneity of mulch coverage.
Better adhesion of the mixture to the surface.
Facilitates plant growth by creating a protective layer.
Reduces the impact of rain and wind.
Increases soil cohesion and combats erosion.

XUV URBA-MULCH PRE

Model	XUV URBA-MULCH PRE
Price VAT incl.	€ 80
Price VAT excl.	€ 66,12
For use with	All hs systems
Product type	Paper mulch
Surface	100 - 180 gr/m²
Weight	10 kg

URBA-MULCH PREMIUM: all-in-one pellet hydromulch
URBA-MULCH PREMIUM is packed in 10 kg bags and is easy to use, transport and store.
URBA-MULCH® mulch is an exclusive URBAVERT innovation!
Green color
Dosage (flat):
30 kg per 1000 liters of water or 100 gr/m2

Dosage (slope):
4:1 - 120 gr/m2
3:1 - 140 gr/m2
2:1 - 160 gr/m2
1:1 - 180 gr/m2
Content: 10 kg

Thanks to an all-in-one pre-dosed formulation (wood fiber, cellulose, fixative, tracer) and the addition of an expansion agent, URBA-MULCH PREMIUM granule defibrates on its own, without mixing, just in contact with water for a homogeneous solution precisely dosed into the tank of your hydraulic seed drill.

This essential ingredient in the complex mixture of a hydroseeder tank has always been very restrictive in terms of use, dosing and storage. Often in compressed bales of several tens of kilograms, "traditional" mulches had to be shredded before being fed into the tank with the risk of clogging the pump and thus jeopardizing the good execution of the work.

XUV URBA-MULCH ECO

Model	XUV URBA-MULCH ECO
Price VAT incl.	€ 90
Price VAT excl.	€ 74,38
For use with	All hs systems
Product type	Paper mulch
Surface	100 - 180 gr/m²
Weight	20 kg

URBA-MULCH ECO: Pellet hydromulch
Organic mulch without stabilizer and without
expanding agent.
URBA-MULCH ECO is packed in 20 kg bags and
is easy to use, transport and store.
Green color
Dosage (flat):
30 kg per 1000 liters of water or 100 gr/m2

Dosage (slope):
4:1 - 120 gr/m2
3:1 - 140 gr/m2
2:1 - 160 gr/m2
1:1 - 180 gr/m2
Content: 20 kg

URBA-FIX fixative can be added to the URBA-MULCH ECO for sowing
on slopes.
The URBA-MULCH ECO granules defibre without mixing, simply by
contact with water and provide a homogeneous solution precisely dosed
for the tank of your hydraulic seed drill.
This essential ingredient in the complex mixture of a hydroseeder tank
has always been very restrictive in terms of use, dosing and storage.
Often in compressed bales of several tens of kilograms, "traditional"
mulches had to be shredded before being fed into the tank with the risk
of clogging the pump and thus jeopardizing the good execution of the
work.

XUV URBA-FIX 5KG

Model	XUV URBA-FIX 5KG
Price VAT incl.	€ 150
Price VAT excl.	€ 123,97
For use with	All hs systems
Product type	Erosion eliminating
Surface	0,8 gr/m²
Weight	5 kg

A mix of different adhesives, liquids and additives
Ideal for use on steep slopes up to 1:1.

Dosage: 10 to 40 gr per 100 liters of water

Contents: 5 kg

Properties:

- Better homogeneity of mulch coverage.
- Better adhesion of the mixture to the surface.
- Facilitates plant growth by creating a protective layer.
- Reduces the impact of rain and wind.
- Increases soil cohesion and combats erosion.
